

Postgraduate Scholarship Announcement For the Academic year 2025 - 2026

Abdullah Al Salem University announces the available fields of specialization for postgraduate scholarships for the academic year 2025-2026 to pursue master's and PhD degrees. Applications will be accepted from May 1 to May 24, 2025, through the university's official website: www.aasu.edu.kw

For inquiries, please contact us at the following phone numbers: 24637018 / 24637013.

For technical issues, kindly reach us via email at: it.helpdesk@asu.edu.kw

[Application link and list of required documents](#)

General Notes

- Applications will not be accepted after the deadline specified in the announcement.
- Applicants may apply for only one field of specialization.
- Applications that do not meet the requirements will be disregarded.
- Applying does not guarantee that all requirements are met and does not imply automatic acceptance into the scholarship program.
- The application and all required documents must be complete at the time of submission, as follows:
 - The application form must be filled out by clicking on the link: (link).
 - All uploaded documents must be clear, valid, officially approved, and arranged in the same order as listed in the required documents.
 - Incomplete applications will not be processed.
 - Applicants cannot modify their chosen specialization after submitting the application.
- The university is not obligated to fill all available positions and specializations, as applications are subject to evaluation by the relevant committees.

General Requirements

- Applicants must be Kuwaiti nationals.
- Applicants must have good conduct and must not have been convicted of any dishonorable felony or misdemeanor. Additionally, they must be medically fit.
- Applicants must not exceed 35 years of age by the deadline stated in the announcement.
- Applicants must hold final and unconditional academic admission at the time of scholarship application, meeting the following conditions:
 - The academic program must be offered by a university approved by Abdullah Al Salem University.
 - The admission letter must be officially issued and signed by the respective institution.
 - The admission must be endorsed by the cultural office in the designated scholarship country.
 - The admission must be valid for one year, ensuring enrollment eligibility by the deadline of the announcement.
 - The admission must not be subject to any financial restrictions or other limitations that could affect enrollment.
- Applicants must have a minimum IELTS (Academic) score of 6.0 or an equivalent TOEFL iBT score of 60/120, obtained within two years from the announcement date.
- Applicants must successfully pass a personal interview.
- Applicants must have a minimum GPA of 3.0 out of 4.0 (or its equivalent) in their bachelor's degree. A medical science bachelor's degree is an exception, where applicants must have a minimum GPA of 2.67 out of 4.0 (or its equivalent).

Additional Requirements:

- All academic qualifications must be obtained from universities approved by Abdullah Al Salem University, through regular full-time study with continuous residency in the country of study. Applicants must provide supporting evidence of this.
- All qualifications must be aligned with the chosen field of specialization and comply with the specific requirements set by each college and academic program.
- Applicants must not have been regularly enrolled in more than three different universities or colleges during their bachelor's degree studies.
- All academic qualifications must be officially recognized and evaluated according to the regulations of the Ministry of Higher Education in Kuwait.
- Academic qualifications that are partially or fully acquired through universities, colleges, or institutes of applied sciences will not be accepted.

College of Medicine & Health Sciences

And Research Centers:

- Center for Health and Wellbeing.
- Center for Data Science and Artificial Intelligence Research.

Epidemiology/Biostatistics (Master's / PhD) [University list](#)

Program-Specific Requirements:

- Applicants must hold a bachelor's degree in one of the following fields:
 - Pharmacy
 - Nutrition
 - Occupational Health and Safety
 - Environmental Health
 - Medicine
 - Psychology
 - Public Health
 - Biological sciences or related field
- PhD applicants must hold a master's degree in one of the following fields:
 - Computational biology
 - Bioinformatics in biotechnology or related medical fields
 - Epidemiology
 - Biostatistics

In addition to meeting other specified program requirements.

- All applicants must obtain their bachelor's/master's degree from a university accredited by an academic accreditation body recognized by the relevant college.

Public Health (Master's / PhD) [University list](#)

Women's Health (Master's / PhD) [University list](#)

Child Health (Master's / PhD) [University list](#)

Health Policy (Master's / PhD) [University list](#)

Program-Specific Requirements:

- Applicants must hold a bachelor's degree in one of the following fields:
 - Pharmacy
 - Nutrition
 - Occupational Health and Safety
 - Environmental Health
 - Medicine
 - Psychology
 - Public Health
 - Biological sciences or related field
- PhD applicants must hold a master's degree in one of the following fields:
 - Computational biology
 - Developmental Psychology
 - Global Health/International Health
 - Public Health or related field
 - Child Health
 - Child Life
 - Public Health Nutrition
 - Women's Health

In addition to meeting other specified program requirements.

- All applicants must obtain their bachelor's/master's degree from a university accredited by an academic accreditation body recognized by the relevant college.

Anatomy (Master's / PhD) [University list](#)

Program-Specific Requirements:

- Applicants must hold a bachelor's degree in one of the following fields:
 - Medicine
 - Medical genetics
 - Neuroscience
 - Anatomy
 - Physiotherapy
 - Biological sciences or related field
- PhD applicants must hold a master's degree in one of the following fields:
 - Anatomy or related field
- PhD applicants must choose one of the following fields of specialization as the focus of their research:
 - Cardiovascular System
 - Musculoskeletal system
 - Nervous system
 - Respiratory System
 - Digestive System
 - Urogenital System

In addition to meeting other specified program requirements.

- All applicants must obtain their bachelor's/master's degree from a university accredited by an academic accreditation body recognized by the relevant college.

Physiology (Master's / PhD) [University list](#)

Program-Specific Requirements:

- Applicants must hold a bachelor's degree in one of the following fields:
 - Medicine
 - Medical genetics
 - Neuroscience
 - Physiology
 - Physiotherapy
 - Biological sciences or related field
- PhD applicants must hold a master's degree in one of the following fields:
 - Physiology or related field
- PhD applicants must choose one of the following fields of specialization as the focus of their research:
 - Cardiovascular System
 - Musculoskeletal system
 - Nervous system
 - Respiratory System
 - Digestive System
 - Urogenital System
 - Endocrine system

In addition to meeting other specified program requirements.

- All applicants must obtain their bachelor's/master's degree from a university accredited by an academic accreditation body recognized by the relevant college.

Pathology (Master's / PhD) [University list](#)

Program-Specific Requirements:

- Applicants must hold a bachelor's degree in one of the following fields:
 - Medicine
 - Medical genetics
 - Neuroscience
 - Pathology
 - Physiotherapy
 - Biological sciences or related field
- PhD applicants must hold a master's degree in one of the following fields:
 - Pathology or related field
- PhD applicants must choose one of the following fields of specialization as the focus of their research:
 - Cardiovascular System
 - Musculoskeletal system
 - Nervous system
 - Cytology
 - Respiratory System
 - Digestive System
 - Urogenital System
 - Endocrine system

In addition to meeting other specified program requirements.

- All applicants must obtain their bachelor's/master's degree from a university accredited by an academic accreditation body recognized by the relevant college.

Pharmacology (Master's / PhD) [University list](#)

Program-Specific Requirements:

- Applicants must hold a bachelor's degree in one of the following fields:
 - Medicine
 - Medical genetics
 - Neuroscience
 - Pharmacy
 - Physiotherapy
 - Biological sciences or related field
- PhD applicants must hold a master's degree in one of the following fields:
 - Pharmacology or related field
- PhD applicants must choose one of the following fields of specialization as the focus of their research:
 - Pharmacokinetics/dynamics
 - Pharmacogenetics
 - Therapeutics
 - Clinical Pharmacology
 - Chemotherapy
 - Toxicology

In addition to meeting other specified program requirements.

- All applicants must obtain their bachelor's/master's degree from a university accredited by an academic accreditation body recognized by the relevant college.

Microbiology (Master's / PhD) [University list](#)

Program-Specific Requirements:

- Applicants must hold a bachelor's degree in one of the following fields:
 - Medicine
 - Medical genetics
 - Neuroscience
 - Microbiology
 - Physiotherapy
 - Biological sciences or related field
- PhD applicants must hold a master's degree in one of the following fields:
 - Microbiology or related field
- PhD applicants must choose one of the following fields of specialization as the focus of their research:
 - Bacteriology
 - Immunology
 - Virology
 - Medical mycology
 - Parasitology

In addition to meeting other specified program requirements.

- All applicants must obtain their bachelor's/master's degree from a university accredited by an academic accreditation body recognized by the relevant college.

Biochemistry (Master's / PhD) [University list](#)

Program-Specific Requirements:

- Applicants must hold a bachelor's degree in one of the following fields:
 - Medicine
 - Medical genetics
 - Biochemistry
 - Chemistry
- PhD applicants must hold a master's degree in one of the following fields:
 - Biochemistry or related field
- PhD applicants must choose one of the following fields of specialization as the focus of their research:
 - Carbohydrate
 - Molecular
 - Nucleic acids
 - Lipid
 - Protein
 - Enzymology

In addition to meeting other specified program requirements.

- All applicants must obtain their bachelor's/master's degree from a university accredited by an academic accreditation body recognized by the relevant college.
